Risk Assessments for Group Visits

Cotebrook Shire Horse Centre is subject to regular inspections carried out under the Zoo Licensing Act 1981 as well as being subject to all aspects of the Health and Safety at Work Act 1974.

We are committed to continual improvement and our performance will always be in full compliance with relevant legislation and Codes of Practice.

Unfortunately it is not feasible for us to forward in depth details and copies of all our documentation regarding Health and Safety procedures at Cotebrook Shire Horse Centre, given the huge volume of information that this entails. We can however confirm that a comprehensive Health and Safety management system, including risk assessment, is in place and can assure you that the safety of our staff, visitors and all our animals is of paramount importance to us.

We are not able to carry out risk assessments on behalf of groups because we are not aware of all the relevant circumstances regarding your particular visit, for example, we do not know the level of supervision which you are proposing, whether you have any children with special needs, or other relevant individual details. However, we are happy to provide a free preview visit for members of staff to carry out risk assessments on the premises if required (by prior arrangement).

We can also confirm that we have adequate Public Liability Insurance cover for all our activities.
